- ▶ Has the ability to cool the wound surface, and due to its high moisture content, protect exposed nerve surfaces
- ▶ Non adherent to tissue
- ▶ Saves time
- ▶ Managed care friendly
- ▶ Prevents damage to healthy tissue
- ▶ Essential for tissue cell development
- ▶ Assists in autolytic debridement
- ▶ Assists in softening eschar and necrotic tissue
- ▶ Provides an optimal moist wound environment for healing
- ▶ The convenience of sterile gauze plus DermaSyn Hydrogel Wound Dressing
